

PROGRAMME FOR PEANUTS CROPS

Seed germination	Seedling / young plant	Beginning flowering	Beginning of peg and pod development	Full pod	Full seed
NHDeltaCa	NHDeltaCa	NHDeltaCa	NHDeltaK	NHDeltaK	
		CalFlux			
	XStress	XStress	XStress	XStress	XStress
					RainbowWave
	TipTop	TipTop	TipTop	TipTop	

Seed germination	NHDeltaCa @ 3L/Ha + XStress @ 1L/Ha. Improved rooting, removal of micro - nutrient deficiencies. Better plant establishment.
Seedling / young plant	NHDeltaCa @ 5L/Ha + XStress @ 1L/Ha. Stronger stems and greener larger leaves. Improved stress tolerance.
Beginning flowering	NHDeltaCa @ 5L/Ha + XStress @ 1L/Ha + CalFlux @ 1L/Ha. Greater root development and increased number of pods. Increased stress tolerance. Enhancement of flowering and seed quality
Beginning of peg and pod development / full pod	NHDeltaK @ 5L/Ha + XStress @ 1L/Ha. Better filling of pods and seeds. More pods formed.
Full seed	Rainbow Wave @ 3.0 L/Ha to enhance plant senescence and to increase weight, size and quality of seeds.

Use **TipTop** @ 5.0 l/ha as an alternative to **NHDelta** + **XStress** if plant stress is not an issue. For more information contact your local distributor.
