

ZimaFlux Technical Data Sheet

Composition

Water soluble fertiliser containing the micronutrients manganese (Mn) 14% and zinc (Zn) 16% w/w.

Formats

Packaging: 5kg

Features

ZimaFlux prevents zinc and manganese deficiencies. **ZimaFlux** is a water soluble powder formula based on zinc and manganese.

ZimaFlux is formulated using the special Ecoculture technology with rapid action in the prevention and correction of deficiencies due to these microelements.

ZimaFlux improves growth and can help increase the level of sugars in the fruit.

Advantages

- Fast absorption of zinc and manganese due to its formulation technology.
- Recommended for all types of horticultural crops such as, strawberry, soft fruit, ornamentals and especially those crops very sensitive to this type of deficiency such as citrus and nectarines.
- It can be applied both as a foliar spray, which ensures a rapid assimilation of the microelements or via roots through any irrigation system.

Application and Dosage

Foliar application:

Citrus: 1-2 kg / ha in 500 to 1,000 litres of water. An application in spring and 2-3 applications after fruit set.

Fruit trees, vine and olive tree: 2-3 applications of 1-2 kg / ha each during the crop.

Horticultural, strawberry and ornamental: 2-3 applications of 1-2 kg / ha each during the crop.

Cereals: 1-2 kg / ha. 1 or 2 applications as necessary.

Application to the soil:

From 2.5 to 10 kg / ha divided into 3-4 applications during crop cycle.
